

INSYS CONSULTING: THE RIGHT PEOPLE. THE RIGHT RESULTS.

InSys Consulting is a New Jersey based provider of cutting-edge IT resources with an old-fashioned commitment to customer service. We were incorporated as a Women's Business Enterprise in April 2000, but we're far from new to the business. Our senior managers have come to InSys with solid IT careers behind them – most have worked in IT for more than 25 years. Our consultants are all career professionals, with a minimum of ten years' field experience.

InSys offers exceptional service, in an accelerated timeframe, at highly competitive rates. We're dedicated to providing value-added services in a spirit of true partnership. That's one of the reasons we've been cited by Entrepreneur magazine as one of America's fastest growing small businesses.

IT'S ALL ABOUT THE PEOPLE

In IT, getting the right results is a matter of getting the right people. That means people who have the right mix of technical skills and practical experience, and who can also work effectively as consultants within different corporate cultures. Getting those people calls for three things:

- A well-oiled recruiting process that can find and acquire the skills needed. Our recruiters have both the tools and the talent to understand the subtleties of your situation. We can find the people you need, faster than you'd imagine possible.
- A flexible approach to management. Our managers understand that IT projects live in a world of constantly shifting priorities. Our commitment is to change with you, keeping our eyes on the mutual goal of shared success.
- A belief in open communications, without being in your face about it. Our sales execs are there to help you, not to get in your way. They pay close attention to the performance of our consultants, and to your satisfaction with same. They'll look for new ways to add value, but otherwise let you focus where you should – on your business.

**A clear vision of the
objective and a well
defined plan for
reaching it
aren't enough to
get you there.**

**You also need people
who know their jobs
and can work
together as a team.**

**That's how impossible
missions succeed.**

www.insys.com

InSys is first and foremost an IT
consultancy. However, we are
also a certified WBENC member.

For clients with diversity programs,
we offer the best of both worlds.

We provide outstanding
resources, while also supporting
corporate diversity initiatives.

As a corporation, InSys is not so small that it's overly specialized, nor so large that you'll wonder who's really in charge. You're never more than a handshake away from the top of the InSys hierarchy, and the visibility of our executive management is a guarantee of customer satisfaction.

INDUSTRY EXPERIENCE

InSys has worked to support many industries, but our managers and consultants have specialized experience in:

- Financial Services & Insurance
- Pharmaceuticals & Life Sciences
- Logistics & Transportation
- Telecommunications

In each of these industries, InSys consultants have worked as unified teams and as single-source experts.

FUNCTIONAL EXPERTISE

InSys consultants are organized in practice groups according to expertise and experience. Our practice areas include:

- Business Intelligence
- Enterprise Resource Planning
- IT Service Management
- Program & Project Management
- Quality & Process Improvement
- Web Architecture

These groups are both social and professional, and serve as incubators for our own service offerings.

READY TO SERVE

What InSys can do for you can't be truly represented by a bulleted list of skills and service offerings. It can be seen in the longevity of our client relationships.

Talk to us, and we'll tell you what we can do...
